Aerocel[®] Continuous Tube

Unslit EPDM Pipe Insulation

HVAC | VRF | Refrigeration | Linesets
OEM | Hoses | Plumbing

Closed-cell continuous tube insulation for rapid, slide-on installation on longer lengths of copper tube and other piping. Ideal for applications that involve long lengths of tubing such as HVAC linesets and VRF/VRV systems.

Proprietary blend of non-polar EPDM rubber is key to consistent, long-lasting thermal performance and protection against moisture and environmental stresses.

Available in ID's ranging from 1/4" - 2-5/8", wall thicknesses from 1/4" - 1-1/2", with or without talc. See back cover.

Fast, simple to install

Slides easily over new piping

Can be slit, snapped and glued over existing piping

Built-in vapor retarder - No supplemental vapor retarder required for most applications*

Superior environmental stability

Non-polar - does not induce or react with water

Greater UV resistance than NBR/PVC insulation

Non-corrosive on stainless steel and copper piping

Suitable for interior and exterior applications**

Safe for indoor environments

Superior fire safety - 25/50 rated (ASTM E84) and self-extinguishing (ASTM D635)

No CFCs, HFCs, HCFCs, PBDEs, formaldehyde, nitrosamine or fibers

Naturally mold-resistant: no biocides required

Ultra-low PVC content - less than 1%

Aeroflex insulation system solutions

Aerofix[®]

Light-weight, rigid pipe supports, pre-insulated with closed-cell EPDM foam rubber and encased with zero-perm EPDM polymer membrane. Includes built-in pressure sensitive Protape[®] closure system.

AeroFit[™]

Pre-fabricated fitting covers made of closed-cell EPDM rubber for fast installation on HVAC and plumbing piping.

Protape[®]

Zero-perm EPDM-based, self-adhering rubber tape for sealing glued insulation seams and termination points.

Aeroflex Adhesives

Specially formulated adhesives for bonding and vapor-sealing Aerocel insulation. Fast tack and LVOC formulations available.

*Supplemental vapor barrier may be required in extreme low-temperature or high-humidity applications. Protective jacket required for direct-bury applications and if insulation may be subjected to mechanical damage.

**Note: National, state & local energy codes require protection of cellular foam pipe insulation from solar radiation for exterior applications. Jackets and insulation coatings are acceptable. Adhesive tapes are not permitted.

Product: Closed-cell EPDM (Ethylene Propylene Diene Monomer)-based rubber elastomeric foam pipe insulation for HVAC (VRF, chilled water & refrigeration) and plumbing piping.
