

Shelf Life

Aerocel® EPDM Closed Cell Elastomeric Insulation & Accessories

We are often asked for the shelf life of various Aerocel® EPDM insulation and accessories. For all products, the stated shelf life is dependent on product storage.

All Aerocel® products should be stored in a controlled environment with the following parameters:

- Ambient temperature range = 50°F to 85°F [10°C to 29°C]
- Relative humidity = < 50%
- Dry
- In Aeroflex original packaging
- UV exposure (none - direct or indirect)

Aerocel® EPDM Insulation: <i>Unslit Tubes - AC, REF™, ULP®, WG, Continuous, sheets, rolls & AeroFit™ <u>without PSA</u></i>	<u>15-20 years</u> from date of manufacture
