

WELL Building Standard™

The International WELL Building Institute (IWBI) established the WELL Building Standard™ in 2014. WELL’s overall intent is to deliver a vehicle for building owners to enhance the health and well-being of their occupants.

The current WELL rating system is called WELL v2™. It is organized by “Concepts”, “Preconditions”, and “Optimizations”.

Aeroflex USA’s AEROFLEX® brand of EPDM closed-cell elastomeric insulation and accessories can contribute to WELL v2™.

Note: The numbers in parentheses below reference the “Part” of each Precondition and Optimization that AEROFLEX® can contribute to.

Concept	Precondition	Optimization
AIR	A01 Air Quality (1, 2)	A05 Enhanced Air Quality (1, 2)
WATER		W07 Moisture Management (2, 3)
THERMAL COMFORT	T01 Thermal Performance (1)	
SOUND		S02 Maximum Noise Levels (1) S05 Sound Reducing Surfaces (1)
MATERIALS	X01 Material Restrictions (1, 2, 3)	X06 VOC Restrictions (1, 2)
	X02 Interior Hazardous Materials Management (1, 2, 3)	X07 Materials Transparency (1, 3)
