WARNING:

Revised 112525

- AEROFLEX EPDM™ pipe OD's are larger than fiberglass; recommended PVC fitting sizes in chart may be larger than for the same fiberglass pipe size.
- Outside diameters calculated using maximum ID and wall thickness tolerance per ASTM C534 Type I; actual OD may be smaller.
- This table is provided as a convenience for sizing jacketing materials. It is ultimately the responsibility of the installer to determine the correct fit of jacketing materials over AEROFLEX EPDM pipe insulation.
