Shelf Life

AEROFLEX EPDM™ Closed-Cell Elastomeric Insulation & Accessories

We are often asked for the shelf life of various AEROFLEX EPDM insulation and accessories. For all products, the stated shelf life is dependent on product storage.

All AEROFLEX insulation products should be stored in a controlled environment with the following parameters:

- Ambient temperature range = 50°F to 85°F [10°C to 29°C]
- Relative humidity = < 50%
- Dry
- In AEROFLEX original packaging
- UV exposure (none - direct or indirect)

AEROFLEX EPDM™ Insulation: *Standard Unslit Tubes (Black, White/Gray, Continuous) Sheets, Rolls, and AeroFit™* ***without PSA***	*15-20 years from date of manufacture*
